Board of Trustees Meeting of October 20, 2021 IT Report

Microsoft End of Life

Microsoft announced that the end of life for Windows 10 will be 2025. End of life means that Microsoft will no longer provide security updates or support for the product. Windows 10 is currently running on all NJSIG's workstations and terminal servers, and we will need to upgrade to Windows 11. We are starting planning for the upgrade and anticipating issues we might run into. We have also started testing applications on a Windows 11 test environment to be prepared for this change.

Quarterly Loss Runs

The third quarter loss runs have been sent out electronically to all brokers and members. January 2022 will be the next time quarterly loss runs are sent out.

Actuary Reporting For 22/23 Rates

All reports were run on the claims loss data and premium data for the actuaries to assist them with the rate calculations for 22/23.
