

## **12. Association of Governmental Risk Pools (AGRiP)**

## **Pooling Professional Organization**

NJSBAIG is a member of and actively participates in the Association of Governmental Risk Pools (AGRIP).

### **AGRIP**

The Association of Governmental Risk Pools (AGRIP) is a membership organization for public entity risk and benefits pools in North America. Organized in late 1998, it is a successor to the pooling section that operated for nearly 20 years under the auspices of the Public Risk Management Association. It is composed of public entity pools including state agencies, higher education, public or common education, all forms of local governments, and a vast array of governmental special districts, including health care facilities and not for profit organizations. These pools provide a wide range of property, casualty, workers' compensation and employee benefit programs for their members.

NJSBAIG encourages its management as well as the Board of Trustees to attend one of 3 annual conferences held each year.
