Board of Trustees Meeting of November 28, 2018 Information Technology Report

Imageright Upgrade

The first data migration testing will be completed by Friday, 11/30/2018; we will be moving forward with the final test data migration over the weekend of 12/1/2018. This first phase of testing has gone very well due to a dedicated team consisting of power users assigned from each department in conjunction with the IT department.

The go live date is scheduled for Monday, 1/14/2019. Employee training will take place the week of 1/7/2019 - 1/11/2019.

Internet Service Provider RFP

We will be going out for bid for our internet and phone services in the first quarter of 2019. This request for proposals will be for Ethernet services in both the Mount Laurel and Marlboro offices that will support our current and future bandwidth needs for both data and phones in both locations.
