Board of Trustees Meeting of November 18, 2020 IT Report

Credits

The IT department is working with the accounting department to develop the best approach in applying possible contribution credits for members in the accounting system.

Disaster Recovery Changes

The IT department issued a RFP for cloud data storage and recovery services. The committee evaluated the submissions and the recommendation of the committee is an action item on today's agenda. If the board accepts the recommendation of the committee, we will move forward with a new disaster recovery plan..
